INDUSTRIES
METAL FABRICATION AND LASER CUTTING

About us

Gajjar Industries ISO 9001-2015 is a hub to all CNC laser cutting, CNC bending and precision sheet metal component requirements.

CNC Laser Cutting

We provide CNC laser cutting in copper, brass, aluminum, stainless steel and mild steel. Our services are extensively used to cut and fabricate different kinds of industrial parts using sheet metal of various thickness and sizes.

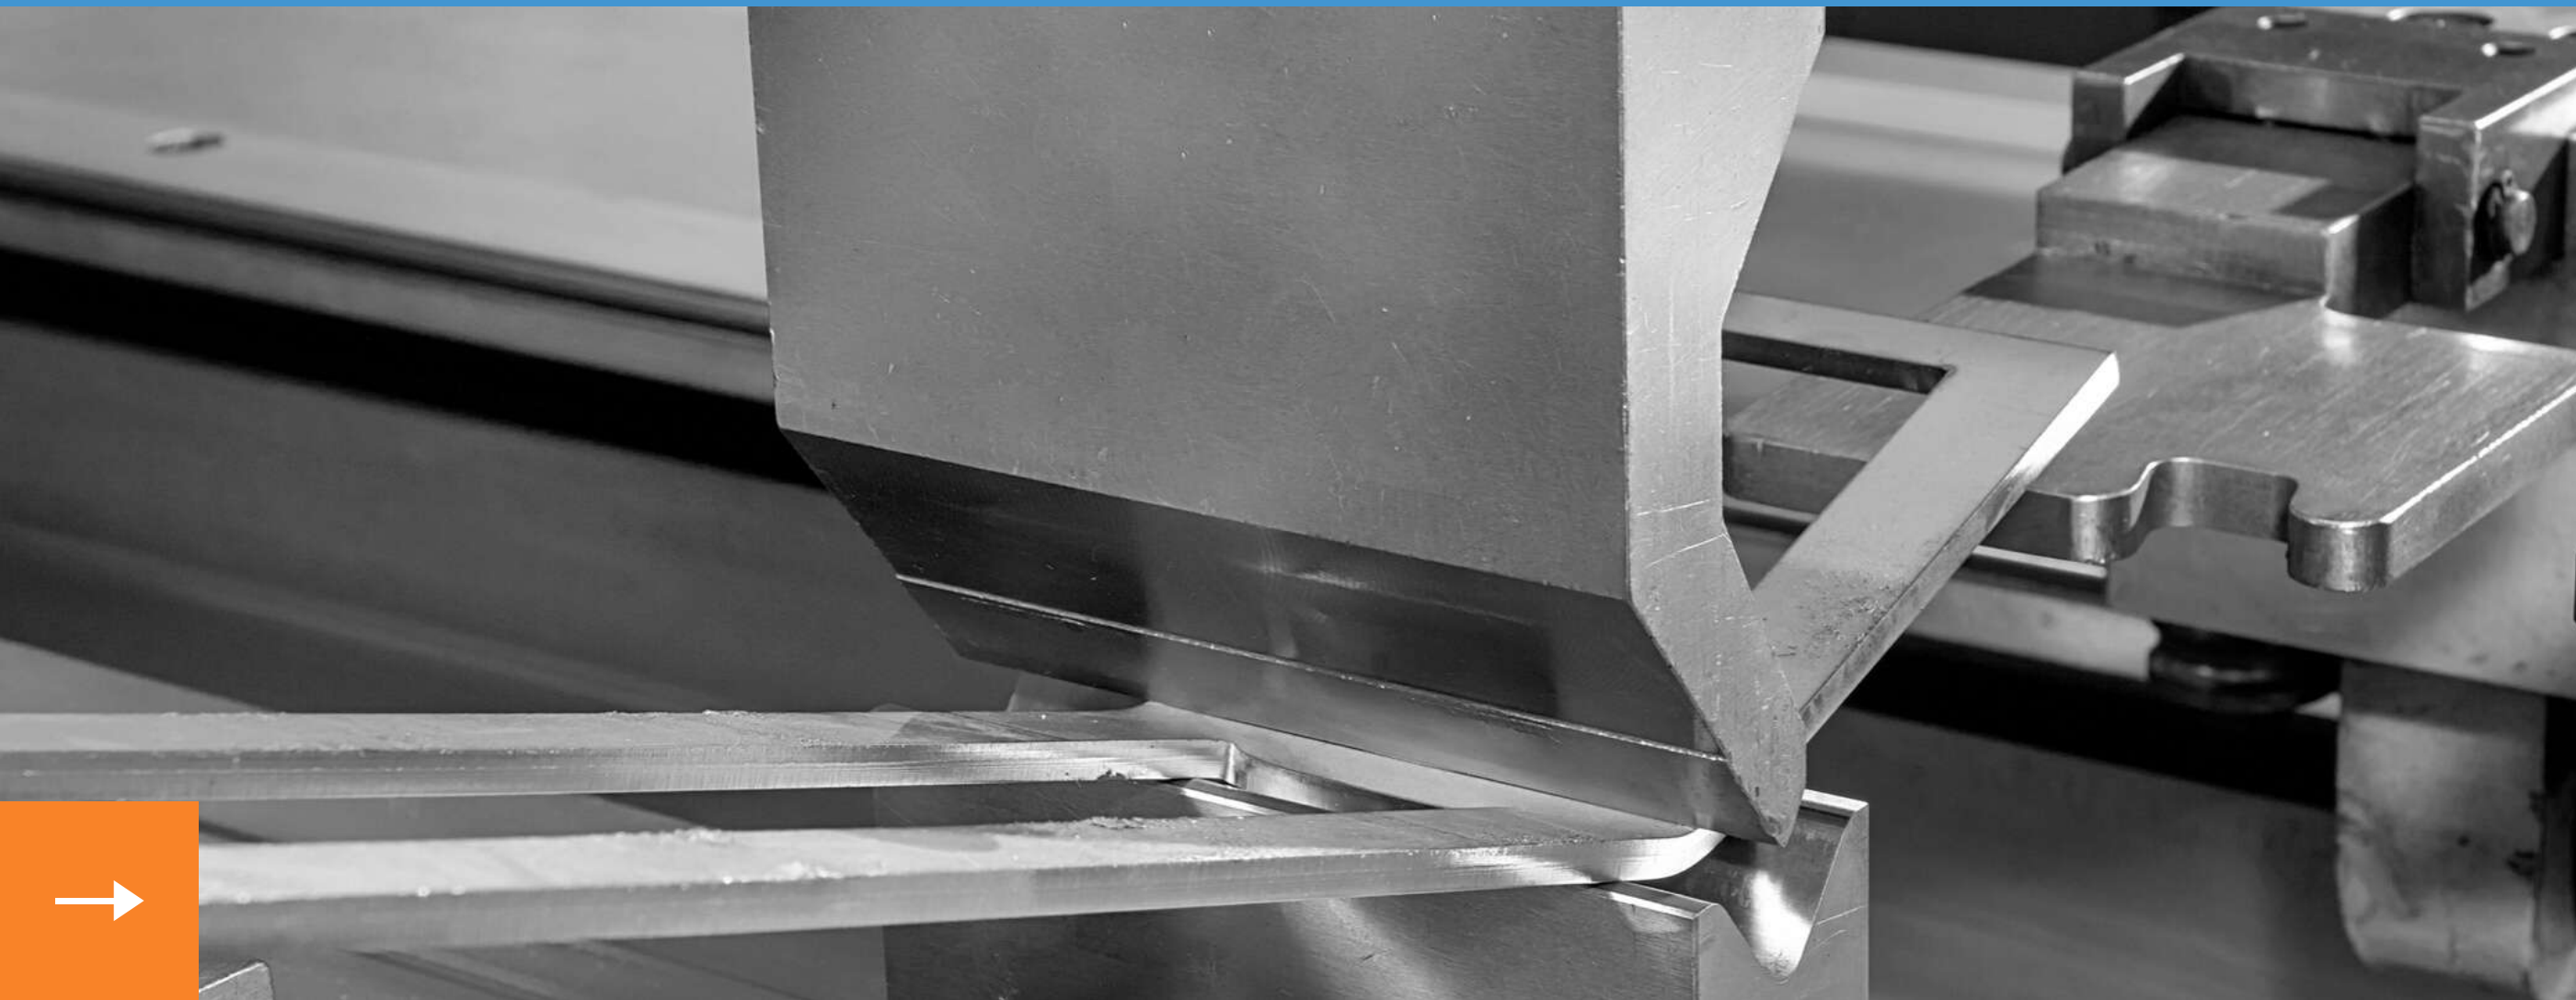

Sheet Metal Fabrication

We specialize in manufacturing parts and components for corresponding areas of industrial engineering applications. We employ various fabricating procedures comprising cutting, bending, forming, welding, assembly, deep drawing parts and finishing to manufacture a wide range of sheet metal products.

Precision Engineering Components

Each of the precision sheet metal components manufactured by us possesses a high degree of durability, performance and price competitiveness. We process through the latest designing, modeling, and programming software that molds the desired product as per the requirement.

Materials

ALUMINIUM

BRASS

COPPER

CARBON STEEL

GALVANIZED STEEL

MILD STEEL

STAINLESS STEEL

CNC LASER CUTTING MACHINE

2000MM x 4000MM Cutting Capacity
25MM Carbon Steel.

08

C.N.C. PRESS BRAKE

3000 MM x160 Tones Bending Capacity
8 MM Thick.

Capacity

CNC LASER CUTTING MACHINE

1500MM x 3000MM Cutting Capacity
12MM Carbon Steel.

Why Gajjar Industries

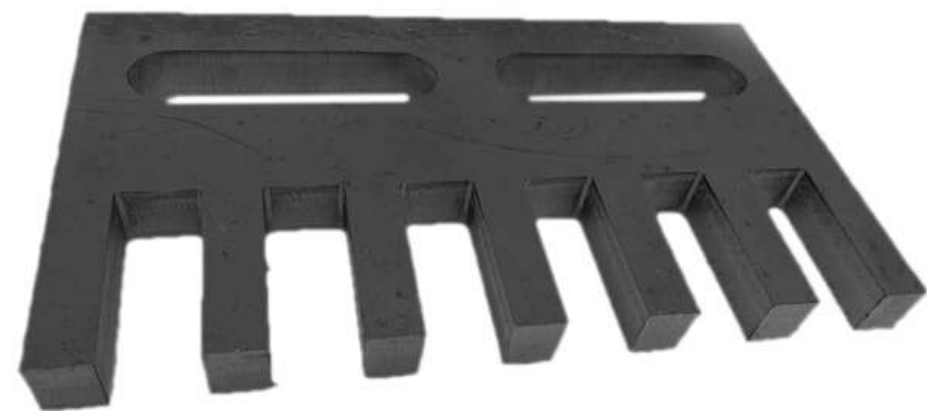

- 100% accurate designing, cutting, bending
- Advanced technology to deliver best in class results
- Cost effective component manufacturing
- Trusted quality standards since 4 decades
- Less investment on tooling
- Fast delivery for high volume quantities
